PHILOSOPHICAL MAGAZINE LETTERS, 1999, VOL. 79, NO. 12, 931–935

SUBJECT INDEX

Vol. 79

PAGE

A15 precipitates, orientation relationships in Nb–Al(–X) alloys 93
Age hardening in Al–Mg–Cu alloy, origin of 639
Al–3 wt% Cu alloy, precipitation in 171
Al–Co–Ni quasicrystal with superstructure 225
Al–Cu alloys, prediction of equilibrium precipitate shapes in 683
Al–Cu–Fe, plastic flow in icosahedral 1
Al–Mg, high-resolution microscopy of grain-boundary migration in 511
Al–Mg–Cu alloy, origin of initial rapid hardening in 639
Al–Ni–Co quasicrystal, stability and strain under high pressure 691
Al–Pd–Mn quasicrystals, plastic deformation of 333, 785
$Al_{81}Fe_8Cr_{11}$, lattice parameters of hexagonal 181
Al_2O_3, creep resistance in ion-doped 249
Amorphization induced by deformation 305
Amorphization of Se by mechanical milling 747
Amorphous oxide semiconductors, electronic transport in 755
Amorphous semiconductors, photoinduced defect creation in 375
Anderson model, precursor of non-Fermi liquid behaviour in 595
Antiferromagnetic correlations in pair of manganese impurities 137
As_2S_3 glass, spectral dependence of photoexpansion in 25
Au–$Ba_2Cu_3O_{7-\delta}$, resistivity of sintered 369

$BaTiO_3$, atomic structure of twin-boundary junction in 99
$BaTiO_3$, chemical bonding state at grain boundaries in 327
$BaTiO_3$, thin films, atomic structure of dislocation cores in 859
Bi, nanoscale particles in glassy crystalline matrix 481
$Bi_2Sr_2CaCu_2O_y$: direct-space crystallography 741
BN, stacking disordering in 217
Bond-valence charge distribution in $[M_2Cu_2O_3]_m[CuO_2]_n$ cuprates 383
Boundary, low-angle, in deformed Ti_3SiC_2 163

Cadmium selenide, epitaxial growth on gallium arsenide 837
Carbon nanotube films by decomposition of silicon carbide 153
Carbon nanotubes, defects in 473
CdTe films, surface sublimation and relaxation in 241
Cerium, phonon densities of states in 297
Chalcogenide glasses, photoinduced optical anisotropy in 449
Chemical ordering in Ti–Al–Nb 551
$Co_{42}Zr_{58}$, pressure dependence of Ni diffusion in 827
Colloidal metal clusters, self assembly of 569
Copper bicrystal, slip bands in 233
Copper single crystals, strain-hardening of 869
Copper, plateau behaviour in cyclic stress–strain curve of 715
Copper, shape effect related to orientation of deformation in 919
Crack propagation in inhomogeneous materials 187
Crack, self-affine, roughness parameters 629
Creep, resistance in ion-doped Al_2O_3 249
Cu, structural multiplicity of incoherent twin boundary in 409
CuO, multiple phase transitions in 819

Defects in iron aluminides probed with positrons 115
Defects in single-walled carbon nanotubes 473
Defects, planar in massively transformed Ti–Al alloys 519

Defects, topological, in ferrofluid foam . . . 389
Deformation of soap film junctions . . . 887
Deformation-induced amorphization in ball-milled silicon . . . 305
Density of states in polymorphous silicon . . . 763
Diffusion of oxygen in corundum . . . 619
Diffusion, pressure dependence of Ni diffusion in . . . 827
Diodes, transit-time, studied by EBIC . . . 55
Disclinations and dislocations at crystal–glass interfaces . . . 709
Dislocation core structure, importance of . . . 897
Dislocation cores in $BaTiO_3$ thin films . . . 859
Dislocation density evolution in Al–Pd–Mn quasicrystals . . . 785
Dislocation intersections in silicon . . . 107
Dislocation loops, glide in metals . . . 273
Dislocation structure at crystal–glass interfaces . . . 709
Dislocation structure of $LaNi_5$ alloy . . . 699
Dislocation, core reconstruction in silicon . . . 9
Dislocations in GaN by plastic deformation . . . 423
Dislocations, dissociation in twist boundaries in silicon . . . 531
Dislocations, glide in β silicon nitride . . . 19
Disordered system, electronic spectrum of . . . 129
Dysprosium dopant atoms in $Bi_2Sr_2CaCu_2O_y$ . . . 741

EBIC technique applied to impact avalanche transit time diodes . . . 55
Electromagnetic radiation pulses induced by material failure . . . 195
Electron diffraction analysis of deformed Al–Pd–Mn quasicrystals . . . 333
Electron microscope study of iron–palladium alloy . . . 31
Electron microscopy of dislocations in GaN . . . 423
Electronic spectrum of a disordered system . . . 129
Electronic transport in amorphous oxide semiconductors . . . 755
Embedded atoms in metals, ionic states of . . . 125
Epitaxial growth of electrodeposited cadmium selenide . . . 837
Erratum: Orientation relationships in Nb–Al(–X) alloys . . . 771

Fe, regular arrangement of SmH_2 fibres in . . . 729
FeCrTi alloy, kinetics of σ-phase formation in . . . 87
Ferrofluid foam in gravity force field . . . 389
Ferromagnetic correlations in pair of manganese impurities . . . 137
Flow stress, temperature dependence in Ir_3Nb . . . 673
Fracture and tensile strength of tilt grain boundary in SiC . . . 659
Fracture, triaxial, in granite . . . 79

GaAs, TEM of low-load indents in . . . 805
Gamma-surfaces in quasicrystals . . . 721
GaN, electron microscopy of dislocations in . . . 423
GaN, formation of nanopipes in . . . 147
GaSe, optical properties of Li-doped . . . 575
GdZn, hydride phases of . . . 63
Glide dislocations in β silicon nitride . . . 19
Glide of dislocation loops in metals . . . 273
Grain boundaries in doped $BaTiO_3$ . . . 327
Grain-boundary diffusion in Cu . . . 409
Grain-boundary diffusion sintering of particles . . . 877
Grain boundary in $BaTiO_3$ films, dislocation cores in . . . 859
Grain boundary migration in Al–Mg . . . 511
Grain-boundary migration in ZnO nanocrystallites . . . 417
Grain-boundary sliding, influence of slip on . . . 545
Grain boundary, slip band transfer through . . . 233
Grain-boundary tensile strength in columnar ice . . . 503
Grain boundary, tilt, in cubic SiC . . . 659

Granite, EM radiation associated with fracture in 79

Haematite, unusual magnetization process in 283
Hall sign anomaly in $Tl_2Bu_2CuO_{6+\delta}$ films 41
High-T_c superconductor $HgBa_2Ca_3Cu_4O_{10+\delta}$, TEM study 429
HREM observation of grain-boundary migration in Al–Mg 511
HREM study of surface modification of Si by molten Al 913
HRTEM observation of sublimation in CdTe 241
HRTEM study of low-angle boundary in Ti_3SiC_2 163
Hydrogen-disproportionation processing of Sm_2Fe_{17} 729

Ice, tensile strength of grain-boundary in 503
Icosahedral Al–Pd–Mn, electron diffraction analysis of 333
Icosahedral order and disorder in semiconductors 359
Interface, stability of, between lead particles and quasicrystals 561
Interfaces, misfit disclinations and dislocations at crystal–glass 709
Intermetallic GdZn, hydride phases of 63
Ionic states of embedded atoms in metals 125
Ir_3Nb, temperature dependence of flow stress in 673
Iron aluminides, positron probe of defects in 115
Iron–palladium, order and composition in alloy of 31

Jog motion in γ-TiAl via molecular dynamics 773

$LaNi_5$ alloy, mechanical properties and dislocation structure of 699
Ledge motion in Al–Mg alloy 511
Line defects, skew, in graded materials 209

$[M_2Cu_2O_3]_m[CuO_2]_n$ cuprates, spin ladders of 383
Magnetic vortex interactions in $YBa_2Cu_3O_{7-\delta}$ 841
Magnetization process in haematite 283
Manganese impurities, ferromagnetic and antiferromagnetic correlations in . . . 137
Martensitic transformation in $(TiPd)_{50}(TiNi)_{50}$ 265
Mechanoluminescence from $Sr_2Al_2O_6$:Eu 735
Melting of nanoscale Bi particles 481
Melting temperature of lead particles at interface with quasicrystals 561
Metallic glasses, diffusion of Ni in 827
Metal–semiconductor phase transition in vanadium oxide 813
MgO, movement of Pt markers during solid-state reaction 609
Microcrystalline Si–Ge films, structure of 71
Mo precipitates in supersaturated Mo_5SiB_2 351
Mo_5SiB_2, Mo precipitates in 351
Molecular dynamics investigation of jog motion in γ-TiAl 773

Nanocrystallites of ZnO, phase transformation in 417
Nanoindentation loading curves, indenter tip radius and load frame compliance calibration using 649
Nanopipes, formation of in GaN 147
Nanoscale Bi particles, melting and solidification of 481
Nanotube carbon films by decomposition of silicon carbide 153
Nanotubes, single-walled carbon, defects in 473
Nanotwin networks connecting columnar defects in $YBa_2Cu_3O_{7-\delta}$ 841
Nanotwinning in deformed γ-TiAl based alloy 49
Nano-undulations of nickel films on substrate 497
Nb–Al(–X) alloy, orientation relationships between A15 precipitates and Nb-rich matrix 93
Nb–Al(–X) alloys, orientation relationships in (Erratum) 771
Neutron scattering by cerium, phonon densities of states 297
Ni_3Al, superdislocations in 849

Nickel films, nano-undulations of . . . 497
Nickel titanates, microstructures of . . . 901
NMR study of precipitates in Al–3 wt% Cu . . . 171

Optical properties of p-type GaSe . . . 575
Order and composition of ion–palladium alloy . . . 31
Oxidation rate enhancement of titanium films . . . 289
Oxygen self-diffusion in corundum . . . 619

Peierls model of dissociation of superdislocations in Ni_3Al . . . 849
Peturbation theory, many-body . . . 581
Phase transformation in ZnO nanocrystallites . . . 417
Phase transitions in CuO . . . 819
Phonon densities of states in cerium . . . 297
Photoexpansion in As_2S_3 glass . . . 25
Photoinduced defect creation in amorphous semiconductors . . . 375
Photoinduced optical anisotropy in chalcogenide glasses . . . 449
Plastic deformation of Al–Pd–Mn quasicrystals . . . 785
Plastic deformation of metals without dislocations . . . 797
Plastic flow in icosahedral Al–Cu–Fe . . . 1
Plasticity, control with coherency strain . . . 343
Positron probe of defects in iron aluminides . . . 115
Precipitate shapes in Al–Cu alloys . . . 683
Precipitates, Mo in supersaturated Mo_5SiB_2 . . . 351
Precipitation in Al–3 wt% Cu, NMR measurements . . . 171

Quantum dots, TEM analysis of . . . 201
Quasicrystal Al–Co–Ni with superstructure . . . 225
Quasicrystal Al–Ni–Co, stability and strain under high pressure . . . 691
Quasicrystalline sphere packing . . . 441
Quasicrystals of Al–Pd–Mn, dislocation density in . . . 785
Quasicrystals, electron diffraction from deformed Al–Pd–Mn . . . 333
Quasicrystals, gamma-surfaces in . . . 721
Quasicrystals, stability of interface with lead particles . . . 561
Quasicrystals: comment on hierarchical porosity in . . . 925
Quasicrystals: reply to comment on hierarchical porosity in . . . 929

Resistivity of Au–$YBa_2Cu_3C_{7-\delta}$ sintered materials . . . 369

Screw dislocations in low-angle twist boundaries in silicon . . . 531
Screw dislocations on cross-slip planes in γ-TiAl . . . 539
Se, mechanical-milling induced amorphization of . . . 747
Self-similarity of crack propagation . . . 187
SEM study of slipbands in copper bicrystal . . . 233
Semiconductor–metal phase transition in VO_2 films . . . 603
Shape effect related to orientation of deformation in Cu . . . 919
Shearing in BN by ball milling . . . 217
Si, surface modification by molten Al . . . 913
SiC, tensile strength and fracture of tilt grain boundary in . . . 659
Si–Ge microcrystalline films, structure of . . . 71
Silicon carbide, formation of carbon nanotube films from . . . 153
Silicon nitride, glide dislocations in . . . 19
Silicon, core reconstruction of 90° partial dislocation in . . . 9
Silicon, deformation-induced amorphization in . . . 305
Silicon, dislocation intersections in . . . 107
Silicon, dissociation of screw dislocations in . . . 531
Silicon, polymorphous, density of states in . . . 763
Sintering of two cylindrical particles . . . 877
Sintering, analysis by surface diffusion . . . 257

Slip bands in copper bicrystal 233
Slip, influence on grain-boundary sliding of 545
SmH_2 fibres, regular arrangement in α-Fe matrix 729
Soap film junctions, deformation of 887
Soap froths, equilibrium structure of 491
Space-charge limited conductivity in polymorphous silicon 763
Stacking disordering in BN by ball milling 217
Strain-hardening behaviour of copper single crystals 869
Stress distribution using mechanoluminescence from $Sr_2Al_2O_6$:Eu 735
Stress–strain curve of copper, plateau behaviour in 715
Superdislocations in Ni_3Al, planar dissociations 849
Surface diffusion, analysis of sintering by 257
Surface sublimation in CdTe films 241
Synchrotron radiation diffraction imaging in haematite 283

TEM analysis of shape and size of quantum dots 201
TEM observations of low-load indents in GaAs 805
TEM study of high-T_c superconductor $HgBa_2Ca_3Cu_4O_{10+\delta}$ 429
Tensile strength and fracture of tilt grain boundary in SiC 659
Ti–Al alloys, planar defects in massively transformed 519
Ti–Al–Nb, theoretical study of chemical ordering in 551
TiAl, anisotropic line tension of screw dislocations in 539
TiAl, molecular dynamics investigation of jog motion in 773
TiAl, nanotwinning in deformed alloy 49
TiAl, weak-beam analysis of dissociated superdislocations in 315
TiAl, yield stresses of slips in 897
$(TiPd)_{50}(TiNi)_{50}$, martensitic transformation in 265
Titanium films, oxidation of 289
$Tl_2Bu_2CuO_{6+\delta}$, Hall sign anomaly in 41
Transport, electrical, in p-type GaSe 575
Twin boundary in Cu, structural multiplicity of 409
Twin-boundary junction in $BaTiO_3$ film 99
Twin-intersection-related nanotwinning in γ-TiAl 49
Twist and shear boundaries in silicon 107

Vacancy clusters, anomalous production in metals 797
Vanadium dioxide thin films on sapphire 813
VO_2 films, semiconductor–metal phase transition in 603
Vortex phases in anomalous peak effect 399

Weak-beam analysis of superdislocations in γ-TiAl 315

$YBa_2Cu_3O_{7-\delta}$, columnar defects in 841
Yield stresses of slips in γ-TiAl 897

Zinc oxide nanocrystallites, grain-boundary migration in 417

PHILOSOPHICAL MAGAZINE LETTERS, 1999, VOL. 79, NO. 12, 937–946
